

## **Me, Myself and Enemy**

This is the end of everything  
This is the end of new beginnings  
This is the end of everything  
This is the end of new beginnings

Me, myself and enemy  
Me, myself and enemy

This is the end of everything  
This is the end of new beginnings  
This is the end of everything  
This is the end of new beginnings

Me, myself and enemy  
Me, myself and enemy

Me, myself and enemy  
Me, myself and enemy

## **Birmingham**

See your fate, coming to you  
See your fate, seeking for you  
Don't feed the demon, the demon inside  
Don't feed the demon, the demon inside

Now is the, now is the,  
Now is the time  
To step out, to step out,  
Into the light  
I won't leave, I won't leave,  
won't leave your side  
Now is the, now is the,  
Now is the time

Free from the trap of your thoughts  
and past illusions  
You're still a furious, a furious man  
Don't feed the demon, the demon inside  
Don't feed the demon, the demon inside

Take me down, don't leave me behind  
Take me down, don't leave me behind  
Don't feed the demon, the demon inside  
Don't feed the demon, the demon inside

Now is the, now is the,  
Now is the time  
To step out, to step out,  
Into the light  
I won't leave, I won't leave,  
won't leave your side  
Now is the, now is the,  
Now is the time

## **Battlefield**

All the time, time, time, you kill your self, self  
All the time, time, time, you kill your self, self  
When you smile, smile, smile, wounded inside, side  
All the time, you kill yourself

All the roads they lead nowhere,  
empty roads  
I am in grief but no one knows,  
I'm on my own  
You close the gate, I stay outdoors  
I grieve alone

All the time, time, time, you kill your self, self  
All the time, time, time, you kill your self, self  
When you smile, smile, smile, wounded inside, side  
All the time, you kill yourself

All the roads they lead nowhere,  
empty roads  
I am in grief but no one knows,  
I'm on my own  
You close the gate, I stay outdoors  
Left alone

All the time, time, time, you kill your self, self  
All the time, time, time, you kill your self, self  
When you smile, smile, smile, wounded inside, side  
All the time, you kill yourself

## **Bruised**

In the dark you don't see anybody  
In the dark it will follow your trail  
In the light of the moon  
A pair of eyes on you

You should have known  
to not run here for cover  
You should have known  
to not run here for cover

Beaten and bruised, is this your free will?  
Beaten and bruised, you are standing so still.  
Gather the strength you will need for this one,  
stand still and let it come.  
In the dark you don't see anybody  
In the dark it will follow your trail  
In the light of the moon  
A pair of eyes on you

You should have known  
to not run here for cover  
You should have known  
to not run here for cover

## **Cathedral**

As we both walk, towards the fog,  
what is there to expect, nothing can hold us back  
I feel your mood, in a world of pain,  
Come take my hand, do you feel the same

Is this all you needed?  
Is this all you had?

The times are rough, what we need is Kraft,  
Now we stand together, for worse or better  
I feel your mood, in a world of pain,  
Come take my hand, do you feel the same

Is this all you needed?  
Is this all you had?

I feel your mood, in a world of pain,  
Come take my hand, do you feel the same ...

## **Hundreds**

Calling your name in the dark, you're near.  
Calling my name, calling my name.  
Calling your name in the dark, you're near.  
Calling my name, calling my name.

Hundreds of tears, hundreds of tears before you go  
Hundreds of tears, hundreds of tears before you go  
Mysterious feelings that keep me believing that you are the one,  
Mysterious feelings that keep me believing that I need to hold on...

Calling your name in the dark, you're near.  
Calling my name, calling my name.  
Calling your name in the dark, you're near.  
Calling my name, calling my name.

I give up on you, you give up on me, our paths divide  
In a different realm, hidden from now, this bond is still alive  
Hundreds of tears, hundreds of tears before you go  
Hundreds of tears, hundreds of tears before you go

Hundreds of tears, hundreds of tears before you go  
Hundreds of tears, hundreds of tears before you go, and then you went away, and then you went away  
Hundreds of tears, hundreds of tears before you go  
Hundreds of tears, hundreds of tears before you go, and then you went away, and then you went away  
Hundreds of tears, hundreds of tears, hundreds of tears  
Hundreds of tears, hundreds of tears, hundreds of tears  
Mysterious feelings that keep me believing that you are the one,  
Mysterious feelings that keep me believing that I need to hold on...

## **Frost**

Come down, to see the light  
Come down, to see the light  
You will fall  
You will fall

Running for miles through the frost  
Grieving for all that is lost  
The endless horizon you fear  
Help is nowhere near.  
Everything's taken away  
What is left to stay?  
What is left to stay?

Come down, to see the light  
Come down, to see the light  
You will fall  
You will fall

Where does all the hope go,  
when there's nothing it can cling to?  
All the wishing all the longing,  
lead to nothing.  
All the wishing all the longing,  
lead to nothing, lead to nothing

Running for miles through the frost  
Grieving for all that is lost  
The endless horizon you fear  
Help is nowhere near.  
Grieving for all that is lost,  
until the end of the frost,  
until the end of the frost...

## **In The City**

Fate is fate, fear the end  
Fate is fate, fear the end

People walking through the night, faceless people with dead eyes  
People walk the streets at night, watch you passing by

In the city, people walking through  
In the city, people watching you

Fate is fate, fear the end  
Fate is fate, fear the end

People walking through the night, faceless people with dead eyes  
People walk the streets at night, watch you passing by

In the city, people walking through  
In the city, people watching you  
In the city, people walking through  
In the city, people watching you

In the city, people walking through  
In the city, people watching you  
In the city, people walking through  
In the city, people watching you  
In the city, people walking through  
In the city, people watching you, people watching you...

## **Dust (Remember your mission)**

All the dust that's in the air  
All the dust that's in the air  
settles down and goes nowhere  
All the dust that's in the air

You hold the dagger above my head  
Our eyes lock and you ask me to take care  
Remember your mission you plead,  
and I finally see, another chance at this,  
to just be me.

All the dust that's in the air  
All the dust that's in the air  
settles down and goes nowhere  
All the dust that's in the air

You hold the dagger above my head  
Our eyes lock and you ask me to take care  
Remember your mission you plead,  
and I finally see, another chance at this,  
to just be me.

All the dust that's in the air  
All the dust that's in the air  
settles down and goes nowhere  
All the dust that's in the air

## **Silent**

I, I see you at the station, you, you dont know me

I, I'm your silent friend, I'm your silent friend

Soon enough you will know me, you will remember my face, like a long forgotten dream

You can't hear me, but you feel me, because I'm your silent friend

Flying through your memories, your past so far away, still these times and things will change

Who and what will remain, I won't go away, I'm your silent friend

You, you will be strong, you, you will hold on to love

I, I, I never want to fail you, I, I, I see you in my dreams

I, I'm your silent friend, I'm your silent friend
